dust proof

## TAG COMPATIBILITY

SHOE TAG YES

BIB TAG YES

TRI-TAG YES

## WARRANTY

MANUFACTURER  
WARRANTY 1 year

EXTENDED  
WARRANTY Yes (Available 1 Year)

The 4 Port Sapphire System is designed for most race events providing the timer with everything they'll need. This system includes:

- > 4 Port Reader
- > 3 RM Timing Performance Mat Antennas or 4 Ramp Antennas
- > Option: RM Timing Side Mount multi-sport antennas
- > Built-in Pepwave Wifi Bridge and Switch
- > RM Timing Software & Cables included

With RM Timing Systems you have many options when it comes to antenna configurations. With ground based antennas in our cable ramps or mat solutions, you are using the high-end industry standard. This system setup has been used to time many of the largest running events in the world! Alternatively, you can use truss or arch mounted antennas to avoid having anything on the ground. For multisport events, such as triathlons, you may set up side mounted antennas sitting low to the ground, the mat based system, or a combination of both.
